# BolognaFiere launches Fuels Mobility

Von Gwen Kaufmann

Donnerstag, 25. Februar 2021

H2O, BolognaFiere's exhibition platform dedicated to water and methane – with ACCADUEO (the International Water Exhibition) and CH4 (the exhibition dedicated to technologies and systems for the transport and distribution of gas) – will be enriched thanks to the collaboration agreement signed in 2020 with Mirumir and In Fieri, by the events ConferenzaGNL, HESE and Dronitaly. This important exhibition network that will be the first to offer a comprehensive overview of the world of energy vectors, will now also include FUELS MOBILITY (The Service Station of the Future). All events are scheduled to take place from June 23 to 25, 2021 in Bologna.

The new event will focus attention on service stations (over 24,000 in Italy) and their transformation in response to the most modern energy vectors (LNG, hydrogen, electricity, methane), an evolution that will see them change from petrol stations to multi-energy and multiservice retailers to provide customers with sustainable mobility.
