

**A TWO-WEEK POSTPONEMENT FOR THE EXHIBITION NETWORK:
H2O, CH4, DRONITALY, CONFERENZAGNL,
HESE and FUELS MOBILITY**

SCHEDULED FOR JULY 6, 7 AND 8 IN BOLOGNA

Bologna, 17 March 2021 - The dates for the BolognaFiere exhibition network that includes H2O (the International Water exhibition) and CH4 (the specialized event concerning systems and technologies for the transport and distribution of gas) have been postponed by two weeks. H2O and CH4 have, in fact, given life to a highly innovative platform that will include, on the same dates, a further four events focused on themes that are strongly connected to the former in order to stimulate a broad debate that will cover also sustainable mobility, fuels and new energy vectors.

H2O, CH4, Dronitaly, ConferenzaGNL, HESE Hydrogen Energy Summit&Expo and Fuels Mobility are the events at the centre of the exhibition network scheduled for July 6,7 and 8 that will be completed with a structured programme of conventions and webinars.

The new dates will provide further assurances in light of the evolution of the pandemic emergency that, also thanks to the progression of vaccine campaigns, appears set to offer greater guarantees for holding the event as well as improved travel possibilities for operators from the sector.

On July 6,7 and 8 BolognaFiere will offer, in one single venue, an integrated and synergic vision of strategic sectors that are key to an economic recovery that prioritizes the environment (as has been emphasised in the EU guidelines) with:

- **H2O, the International Water Exhibition** at this edition will propose exhibition pathways dedicated to digital technologies, treatments and distribution systems, with a focus on sustainability;
- **CH4**, the event dedicated to technologies and systems for the transport and distribution of gas;
- **HESE-Hydrogen Energy Summit&Expo**, an initiative aimed at developing the hydrogen sector;
- **ConferenzaGNL**, an initiative to promote the direct uses of Liquid Natural Gas in the Euro-Mediterranean area;
- **Fuels Mobility**, an event focussing on the evolution of service stations and electric mobility;
- **Dronitaly**, an event for the Italian community involved in drone technology. Dronitaly will foster debate on the most pertinent and urgent themes concerning technologies that are playing an increasingly important role in the management of networks and in environmental protection.
